Instructions for logging in to Energy trading case

The Enel Energy Trading case requires traders to be divided on three different roles:

- consumers
- producers
- speculators

In order to log in as a "consumer" your Trader ID and password have to be one of the following:

TraderID	Password
CONS-1	a
CONS-2	a
CONS-3	a
….	a
….	a
….	a
CONS-998	a
CONS-999	a
CONS-1000	a

In brief, you can choose one of the 1000 IDs that allow you to log in as a "consumer". It could happen that the traderID you chose is already used by someone else so you need to pick up another one. There are a thousand of them, it should not be a problem to find a traderID available!

Password is always "a" so it will be easy to remember it

Same rules apply for "producer" and "speculator". In particular, in order to log in as a "producer" your Trader ID and password have to be one of the following:

TraderID	Password
PROD-1	a
PROD-2	a
PROD-3	a
….	a
….	a
….	a
PROD-998	a
PROD-999	a
PROD-1000	a

in order to log in as a "producer" your Trader ID and password have to be one of the following:

TraderID	Password
SPEC-1	a
SPEC-2	a
SPEC-3	a
….	a
….	a
….	a
SPEC-998	a
SPEC-999	a
SPEC-1000	a
